

"The Professional Services staff was always available to assist with our needs. Their professionalism and availability made it a pleasure to work with them. Without their assistance, this project would have been more challenging and less successful. Thanks for all you do!!"

Chantelle Folkes
Network Engineer
Prince George County Public Schools

Kick Start Packages

Leverage the experts on our Professional Services team to support you during your implementation of Absolute Manage. Get up and running quickly, use fewer resources to do it, and use best practices in your day-to-day operations to experience the full value of Absolute Manage.

	Onsite Delivery	Project Management	Planning & Architecture	Server Installation & Agent Deployment	Knowledge Transfer	Admin Console Configuration
Kick Start (125 hour)	●	●	●	●	●	●
Kick Start Lite (60 hours)		●	●	●	●	●
Kick Start Ultra-Lite (30 hours)				●	●	●
Kick Start SMB (15 hours)				●	●	●

Absolute Manage Kick Start packages include some or all of the following components:

Project Management

Our team of experts will work alongside your deployment team to provide expertise in the implementation of Absolute Manage. This includes the creation of a detailed project plan to keep the project on track as well as supervision, escalations, and status reporting throughout the entire project lifecycle. We provide a Project Manager and Technical Consultant to work directly with your team.

Planning & Architecture

We begin with a site survey to understand your existing environment. Then we collaborate with your network and security teams to design an architecture that supports a secure and scalable implementation of Absolute Manage.

Server Installation & Agent Deployments

Your technical team is provided with assistance and guidance based on best practices throughout the installation of the core Absolute Manage server components. This includes agent deployment to client machines within a test environment and/or pilot site. For Kick Start Ultra-Lite and SMB implementations, this will include a review of your architecture to ensure it will support a secure and scalable implementation.

Knowledge Transfer

We will provide meaningful knowledge transfer to ensure your Network and IT Operations teams are well trained and able to leverage the full value of Absolute Manage post-implementation. This includes an overview of the product architecture as well as a detailed review of the core Absolute Manage modules:

- Software Distribution
- Patch Management
- Inventory Management & Discovery
- Software License Management
- Power Management
- Disk Imaging
- Remote Commands / Control

Kick Start packages include all modules. For Kick Start Lite, choose any 5. For Kick Start Ultra-Lite, choose any 4. For Kick Start SMB, choose any 3.

Admin Console Configuration

Our experts work with your team to help configure the multitude of options available within the Absolute Manage admin console. We help you to configure software policies, license policies, inventory controls and alerts, software packages, smart groups, users, and reports.

Support

The Professional Services team will remotely support your production launch via issue tracking and resolution as well as weekly status calls. We will also facilitate a smooth transition to the Absolute Global Support team for ongoing support post-launch.

The Professional Services team can provide customized services to suit unique or challenging implementations. Contact your Absolute sales representative for more information.

Absolute[®] MANAGE
